

## About Us

P. Michael Fennessy founded Stampcrete International, Ltd some 36 years ago. Michael is an ACI certified concrete finisher and holds over 70 U.S. Patents and Trademarks. Stampcrete takes pride in producing the finest, highest quality integral color pigments than any other company in this industry. They are also known for their superior heavy duty stamping tool sets which give the surface an authentic look, not like the light weight stamps. Stampcrete International, has been used by major theme parks in Orlando, Florida and Paris, France. Michael has seen the decorative concrete industry grow at a record breaking pace these past few years. Stampcrete decided in 2020 it would, for the very first time, offer an exclusive Stampcrete dealership/distributorship whereby a dealer can control all the jobs in his area or simply sell Stampcrete and materials and earn up to 40% profit. The Stampcrete trademark is well known throughout globe, they have two factories along with the corporate headquarters just outside Syracuse, NY.
